ZX Spectrum

SOFTWARE CATALOGUE

This catalogue introduces the first range of Sinclair ZX Spectrum software. Produced by ICL and Psion, these cassettes cover games, education, and business/household management. These programs make full use of the ZX Spectrum's 8 colours, sound generator, and high-resolution graphics.

All cassettes are available direct from Sinclair – and prices include VAT and post and packing.

September 1982 edition.

ZX Spectrum hardware options

ZX Printer – available now

Designed exclusively for use with the Sinclair ZX range of computers, the printer offers ZX Spectrum owners the full ASCII character set – including lower-case characters and high-resolution graphics.

A special feature is COPY which prints out exactly what is on the whole TV screen without the need for further instructions. Printing speed is 50 characters per second, with 32 characters per line and 9 lines per vertical inch.

The ZX Printer connects to the rear of your ZX Spectrum. A roll of paper (65ft long and 4in wide) is supplied, along with full instructions. Further supplies of paper are available in packs of five rolls.

The ZX Microdrive – coming soon

The new Microdrives, designed especially for the ZX Spectrum, are set to change the face of personal computing.

Each Microdrive is capable of holding up to 100K bytes using a single interchangeable microfloppy.

The transfer rate is 16K bytes per second, with average access time of 3.5 seconds. And you'll be able to connect up to 8 ZX Microdrives to your ZX Spectrum.

All the BASIC commands required for the Microdrives are included in the Spectrum.

A remarkable breakthrough at a remarkable price. The Microdrives will be available later this year, for around £50.

Use the FREEPOST order form overleaf.

How to order
